

WHAT MAKES US DIFFERENT?

OUR RESIDENTS SAY IT BEST:

We uncover and address the roots of our resident's addictions:

"The length of this program gives us enough time to get comfortable, talk about the past, elicit the negative emotions, and deal with them in a healthy manner."

We recognize the sensitivity of that challenge and let our residents know they're not alone:

"I feel safe knowing that I have the supervision and support of staff 24 hours a day"

We provide a real-life opportunity to practice new behaviours:

"In its essence, Stonehenge is a microcosm of the communities in which we've struggled. This creates an opportunity to interact pro-socially within a safe environment."

We stress individual responsibility:

"Stonehenge taught me that I am responsible for my behaviours and that I must take ownership for the things I do."

We support our residents when they stumble:

"Mistakes are looked on as challenges."

We celebrate their success:

"The Friday Recognition Awards promote confidence and self-esteem."

We help restore dignity and self-respect:

"Stonehenge is a nurturing and caring facility that promotes healthy lifestyles, re-instills confidence, self-esteem and hope."

Women's Residential Program and
our Harm Reduction Program

GUELPH, ONTARIO, CANADA

WHAT IS STONEHENGE?

Stonehenge Therapeutic Community is a long-term intensive treatment program for men and women whose lives have been devastated by alcohol and drug abuse and whose reality includes the fractured relationships, derailed careers and encounters with the legal system that so often result. Many of our residents are veterans of other, less intensive programs - none of which have produced long-lasting results.

Dougan Hall, Men's Residence

WHAT TREATMENT MODEL DOES STONEHENGE USE?

Stonehenge uses a modified 'therapeutic community' treatment model. Our approach is based on the belief that chronic addiction comes with an acquired lifestyle. We believe that recovery requires a holistic approach that challenges deeply ingrained behaviours and teaches healthy alternatives. We encourage our residents to assist each other in every aspect of their treatment. Our professional staff function as facilitators, guides and role models. Together, residents, staff and alumni comprise a supportive community in which the whole is greater than the sum of its parts - where profound change can and does occur.

HOW LONG HAS STONEHENGE BEEN OFFERING TREATMENT?

We are proud of our long history and our deep roots in the community. Established in 1971, Stonehenge has provided service to more than 12,000 people. Our century homes, which house our residential programs, offer our community members a sense of permanence, history and tradition - which few of them have ever known.

HOW IS THE PROGRAM SET UP?

Stonehenge's 4-6 month residential treatment program consists of the following components:

Orientation (2 weeks): An opportunity for the resident and staff to determine program fit; residents are paired with a supportive peer; no outside communication is allowed in this phase.

Active Treatment (3-4 months): Includes group and individual therapy, workforce therapy, leisure & learning activities, life skills, art therapy and outings.

Re-entry & Transition (1-2 months): Through assisted search for employment, housing, education and recovery supports, residents begin to rebuild their lives and transition back into the community.

Commencement: A monthly ceremony for graduating residents to celebrate in the company of family, friends, fellow residents and Stonehenge staff.

Morrow Hall, Men's Residence

WHAT OTHER SERVICES ARE AVAILABLE?

Opioid Substitution Treatment: Provides access to physician, pharmacy and lab services for those involved in opioid substitution treatment.

Family Group: A monthly group where friends and family members of residents can receive support and learn valuable skills in coping with addictions.

Aftercare: A group of former residents who meet weekly with staff (for up to 2 years) to test their new-found skills while still connected to our program.

Alumni Association: Provides graduates the opportunity to give back to the community through outing support, role modelling and social activities.

WHAT ARE THE REQUIREMENTS FOR ADMISSION?

- ◆ All admissions to Stonehenge are voluntary
- ◆ Referrals are accepted from individuals, doctors, addiction treatment professionals and the criminal justice system
- ◆ Men over eighteen with acute or chronic substance abuse issues will be considered for eligibility
- ◆ Due to the intensity of the program, previous substance abuse treatment is highly recommended
- ◆ Prior to admission, a medical exam establishing ability to participate in the program is required
- ◆ Applicants must be adequately withdrawn from drugs and alcohol before coming to Stonehenge
- ◆ An assessment must be completed by Stonehenge staff to determine eligibility

HOW DO I APPLY?

- For applicants from the local Waterloo-Wellington region, referrals to Stonehenge occur through the region's **Here 24/7 Program**. Applicants must call **1-844-437-3247** (or 1-844-HERE247) or visit www.here247.ca to schedule an assessment.
- Applicants who reside outside of the Waterloo-Wellington region, or are involved with corrections, must contact Stonehenge directly.

HOW DOES THE ASSESSMENT PROCESS WORK?

Assessment for treatment at Stonehenge consists of two separate interviews at our Administration office. In the first interview, personal information is gathered and the severity of substance abuse is assessed through questionnaires and contact with previous treatment sources. In a group setting, applicants and their families are given an overview of the treatment program, with a senior resident available to answer questions. For applicants who are unable to attend due to long distance or incarceration, this interview will occur through a telephone assessment or institutional visit.

Once accepted into the program, a second interview occurs on the day of admission to confirm that the applicant is prepared for treatment and adequately withdrawn from substances.
